WHAT DO THE GREATEST SCIENTISTS SAY ABOUT DISCOVERY OF NEW KNOWLEDGE.

LEONARDO DA VINCI

**" Science comes by observation and not by authority, whoever
in discussions adduces authority uses not his intellect but rather memory "**

GALILEO GALILEE

**" In question of sciences, the authority of thousand is not worth
the humble reasoning of a single individual "**

IMMANUAL KANT

**Enlightenment is man's emergence from his nonage.
This nonage, or immaturity, was not the lack of intelligence,
but lack of determination and courage to use that intelligence
without another's guidance. Sapare aude! Dare to know,
have the courage to use your own intelligence !"**

ALBERT EINSTEIN

"Authority is the greatest enemy of Truth".
